Learning Activity Sheet Kinds of Line Pairs

Directions: Incircle the correct answer

- 1) What is a point?
 - A) A straight figure that extends endlessly in both directions.
 - B) A line segment that intersects at a right angle.
 - C) An exact location in space.
 - D) A line that does not meet.
- 2) How do we read the point in the given image?
 - A) Line segment TA.
 - B) Line MG.
 - C) Point M.
 - D) Parallel lines.
- 3) Which of the following describes a line segment?
 - A) A straight figure that extends endlessly in both directions.
 - B) A line that does not meet.
 - C) A line that intersects at a right angle.
 - D) An exact location in space.
- 4) What is the characteristic of a line?
 - A) It is an exact location in space.
 - B) It is a straight figure that extends endlessly in both directions.
 - C) It is a line segment that intersects at a right angle.
 - D) It is a line that does not meet.
- 5) What is the term used for lines that do not meet?
 - A) Intersecting lines.
 - B) Perpendicular lines.
 - C) Parallel lines.
 - D) Line segments.
- 6) What do intersecting lines do?
 - A) They meet at a right angle.
 - B) They are always of the same distance from each other.
 - C) They do not meet.
 - D) They cross over each other at a point.
- 7) What are perpendicular lines?
 - A) Lines that do not meet.
 - B) Lines that intersect at a point.
 - C) Lines that are always of the same distance from each other.
 - D) Lines that meet or intersect at a right angle.
- 8) Which type of lines are always of the same distance from each other?
 - A) Intersecting lines.
 - B) Parallel lines.
 - C) Perpendicular lines.
 - D) Line segments.
- 9) What is the characteristic of intersecting lines?
 - A) They are always of the same distance from each other.
 - B) They do not meet.
 - C) They meet at a point.
 - D) They meet or intersect at a right angle.
- 10) What is the characteristic of perpendicular lines?
 - A) They do not meet.
 - B) They meet or intersect at a right angle.
 - C) They are always of the same distance from each other.
 - D) They cross over each other at a point.
