### Learning Activity Sheet

#### Phase Changes

A. Take a look at your surroundings. Observe the things that are happening. List down situations you observed that involve phase changes. Write down the description of the situation, identify the initial and final states of the material involved, and determine the phase change it underwent. Use the table below for your answers.

Situation	Initial State	Final State	Phase Change

B. Describe how phase changes affect the motion and arrangement of particles of solids, liquids, and gases. Write your answers on the space provided below. (3 points)
