## Learning Activity Sheet

### Changes as Animals Grow

A. Use the chart below to group the list of baby animals based on the changes that take place as animals grow.

kid	nymph	chick	calf
caterpillar	maggot	bunny	duckling
Born Alive with Body Parts Similar to Parents	Hatched from Eggs and Cared for By The Mother	From Eggs that Develop Differently as They Grow	

B. Complete the paragraph by filling in the blanks.

The young butterfly, frog, and housefly all start from \_\_\_\_\_ laid by the \_\_\_\_\_. The eggs develop into another form, such as \_\_\_\_\_ for butterfly \_\_\_\_\_ for the frog, and \_\_\_\_\_ for the housefly. These young animals continue to undergo more physical \_\_\_\_\_ until they take the \_\_\_\_\_ of the adult animals.
