Learning Activity Sheet

Changes in Growing Animals

Directions: Do the activity below.

What To Know: What changes occur during the stages of growth of an animal?

What You Need: pictures of a chicken and a chick, a dog and a puppy, a cat and a kitten, a goat and a kid

What To Do:

1. Look at the pictures of the young animals and observe their body parts.
2. Look at the pictures of the grown-up animals and observe their body parts.

What You Found Out:

1. What body parts do chickens have that are not found in chicks?

2. What is the difference between the body covering of the chicken and the chick?

3. What changes occur in the kitten as it grows?

4. What changes occur in the puppy as it grows?

5. Give two differences between the kid and the goat.

What You Learned:

What are some changes that animals undergo as they grow?

1.

2.
